

Case Study: Cambian Group Pengwern Special School

Multi room block including sensory and treatment rooms. £300k net

Cambian Pengwern College is a specialist further education college in North Wales, offering day, and up to 52 week residential placements, for young people aged 16 to 25 with a learning disability and complex needs.

The previous classrooms were older style mobile units which weren't designed with specialist needs in mind. The college wanted to make the most of their wonderful, natural environment.

"From start to finish, the TG Escapes team were highly accommodating. They listened to all of our ideas and were very patient as we changed our minds on lots of occasions. They took away all the worry and managed the project from beginning to end for us, meeting all our expectations." Jolene Roberts, Marketing Officer

"It has made such a difference being in a beautiful room that is warm and quiet. It's such a calming environment and I have noticed that the students are much calmer and more engaged. They like the structure of the room: low stimulus really works for our autistic learners." Marie Nicastro, Music Teacher
