

TG Escapes design modular eco buildings providing ideal spaces for special needs.

Our bespoke designs provide bright, secure rooms with floor to ceiling windows, covered walkways, secure lobbies and wide doorways allowing free flow to the outdoors in all weathers. Sun pipes, sedum roofs and energy efficient designs make our 'A' rated buildings more economical.

Each design is bespoke and every project starts with a FREE site visit and survey and we provide one all inclusive price for a full service including:

- Planning permission/ building regulations
- Design and architecture
- Foundations and clearance
- Service connections

Our Learning Escapes are sensitively designed for all year round use, low impact and low maintenance, with complete safety manifestation and regulation compliance.

Special needs vary as do classroom requirements so our bespoke design process means that every building is tailored to your precise needs following the frameworks laid out in the government building bulletins for special needs.

Each building is designed for low environmental impact on the site. Focused learning centres can encourage students at all academic skill levels to interact socially and work together. Our designs can also incorporate sensory learning spaces, treatment rooms and individual work stations.

Recent SEND projects include multi use buildings for the Cambian Group and Priory Education, a sports pavilion for Heart of the Forest Community Special School and a new performing arts studio Swalcliffe Park School for boys with autism.

Our customers have awarded us 5 out of 5, based on 115 reviews

"It's such a calming environment and I have noticed that the students are much calmer and more engaged. They like the structure of the room: low stimulus really works for our autistic learners."

Marie Nicastro, Music Teacher at Cambian Pengwern
